DEC 8 1991

MEMORANDUM

OFFICE OF  
PESTICIDES AND TOXIC  
SUBSTANCES

SUBJECT: Review of a 620 3(C)2(B) Reevaluation of a Waiver Request  
and EEB Data Requirements for Pirimiphos-Methyl.

FROM: Douglas Urban, Acting Chief  
Ecological Effects Branch  
Environmental Fate and Effects Division (H7507C) *Douglas Urban* 12/13/91

TO: John McSweeney  
Accelerated Reregistration Branch  
Special Review and Reregistration Division (H7508W)

The Ecological Effects Branch has reviewed the waiver request of a 71-1(a) Avian Acute Oral-Quail/Duck study with Pirimiphos-Methyl. Actellic 5E Insecticide is registered as an indoor postharvest application to stored crops including corn, rice, sorghum, and wheat. It appears that there are no registered outdoor use patterns with this pesticide. Therefore, this study is no longer needed to fulfill the EEB data requirements.

The submitted 71-2(a) Avian Dietary/Quail has been reviewed by the Ecological Effects Branch and found to be scientifically sound but would not fulfill the data requirements because of discrepancies from EEB guidelines. However, this data requirement has already been fulfilled by previously submitted avian dietary studies. Therefore, it is not required that this study be repeated.

If the registrant still wishes to support the proposed use for treatment of wild bird seed, the EEB requires that the following data be submitted:

71-1(a) Avian Acute Oral/Quail

71-4 Avian Reproduction studies with both quail and duck

For further questions please contact Dan Balluff at 305-7180.
